DETAILED ACTION

Response to Amendment

The amendment to claims 17 and 21-26 have been entered, claim 27 has been cancelled. Claims 10-13, and 17-26 are in this application. Applicant's amendments and arguments, see pages 8-10 filed July 28, 2008 with respect to claims 17 and 21-26 have been fully considered and are persuasive. The rejection of claims 17-26 has been withdrawn.

The reply filed on July 28, 2008 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Applicant's amendment to the abstract was not on a separate sheet as specified in 37 CFR §1.121(h) See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, the Examiner has entered the amendment as an Examiner's amendment.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Seymour Levine on Aug. 26, 2008.

In the Abstract, line 2 delete "ware" and insert –wear--.

The application has been amended as follows:

Allowable Subject Matter

Claims 1—13 and 17-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art neither teaches nor suggests allowing solenoids to be energized at a frequency exceeding a set burnout protection frequency and allowing the exceeding action to trigger adjusting the parameter that causes energizations. In making such adjustments, the prior art does not teach or suggest determining a difference between a rudder order and a rudder stop position after the rudder drive system has achieved a turnoff point in response to the rudder order, comparing that difference to a predetermined rudder position tolerance and when the difference exceeds the rudder position tolerance, using the difference to determine the corrected turnoff point for the rudder drive system so that the rudder stops within the predetermined rudder position tolerance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LIN B. OLSEN whose telephone number is (571)272-9754. The examiner can normally be reached on Mon - Fri, 8:30 -5.

Art Unit: 3661
